

Energy Reduction Technology

Solving the energy crisis through the implementation of meaningful, and practical solutions. Energy consumption habits are not required to change: a one of a kind approach toward creating an energy efficient world.

HVAC Systems Are Responsible for 40%- 50% of Residential & Commercial Energy Bills

HVAC Cycle Optimization

- Eliminate Energy Waste That Inflates Your Monthly Bill!
 - Communicate to the *Air Handler* via a Patented Air Handler Controller
 - Calculates User Habits in Real Time
 - Reduced Cycles = Reduced kWh
 - 15% Average Reduction in Energy Consumption
 - Several Different Models Available including Wifi Enabled

Refrigerant & Coolant Enhancement

- Increase HVAC Efficiency
 - Market Proven Trademarked Liquid Injection
 - Permanently Eliminates *Oil Fouling*
 - Increased Efficiency = Increased Energy Reduction
 - Added to Compressor
 - Restores & Protects System
